Hazardous Material Shipping Labels

- Composite plastic material offers extreme weatherability so label colors stay bright
- Super tacky adhesive back permanently bonds to most surfaces (including low energy surfaces such as polyethylene bags)
- Labels withstand temperatures of -50°

Placard Labels and GHS

While GHS requires proper chemical labeling, the Department of Transportation (DOT) requires proper labeling when you're shipping chemicals.

This means when the product is shipped, the outer package must bear all of the required DOT marks and labels as well as the GHS label information if it is a primary container.

Essentially, DOT labeling does not change with GHS, but when the primary container is also the shipping container, you'll need both.
