

Aluminum Service Entrance Sleeves

Type PSK

5/8" OD

- Forged from pure aluminum with integral solid center barrier
- For combinations of copper, aluminum, and ACSR
- Designed for overhead commercial service and residential installations
- Solid center barrier allows for proper conductor insertion and eliminates the effects of galvanic corrosion in aluminum to copper connections
- Installed with standard dies in hand or hydraulic tools
- Easy push-thru polyethylene color coded caps seal out contaminants
- Connectors are pre-filled with oxide inhibitor to keep air and moisture out
- Conforms to ANSI C 119.4 when properly installed
